OBJECTIVE

To leverage my academic experience with a progressive, forward thinking organization where I can continue to apply my creative problem solving skills in a Computer Science related full-time position.

EDUCATION

Georgia Institute of Technology – Atlanta, GA — Jan. 2020 - Aug. 2023
Masters of Computer Science – GPA: 3.9

University of Maryland – College Park, MD — Sept. 2013 - May 2017
B.S. Computer Science – GPA: 3.72
Minor – Business Analytics — Graduation: May 2017
Robert H. Smith School of Business
Scholars Program — Citation: May 2015
Selective Enrollment Program Environment, Technology, and the Economy

WORK EXPERIENCE

Boeing Intelligence and Analytics — Jan. 2016 – Present
Software Engineer — *Annapolis Junction, MD*

· Maintained and added functionality to a code base consisting of cpp and python
  - Used pybind to access cpp functions in python
  - Worked with svg and svgwrite (python api) to animate images to better visualize results
  - Transitioned the team from Phabricator to GitLab, including issue and wiki migration
  - Set up and maintained GitLab Runner for the team, enabling streamlined CI/CD processes
  - Established CI/CD pipelines in GitLab to automate build, test, and deployment workflows
  - Modified codebase to support SLURM after a cluster upgrade from sbatch
  - Conducted various Linux administrative tasks, including fixing cluster nodes and maintaining environments
  - Utilized Jupyter for advanced analysis and visualization of project data
  - Improved team coding standards and processes:
    - Resolved all failing tests in the main branch and implemented Python coding standards
    - Introduced Git Flow for version control, requiring reviewed and approved merge requests
    - Enforced a no-direct-commit-to-master policy and integrated CI/CD pipelines with required passing thresholds
    - Implemented Pylint standards, limiting errors in the codebase
    - Increased code coverage threshold from 0% to 80% over the course of several years

· Helped in the creation and setup of a multifacated RF application
  - Added functionality to an existing gui that was created in java awt gui
  - Sent and recieved messages over a serial link in a multithreaded C program to comminicate between two computers

- Sent UDP and TCP messages between computers over RF using REDHAWK SDR platform
- Created documentation of the entire project with additional steps that could further enhance the product. The docuementation was delivered to the customer in a timely manner and to their satisfaction.

· Maintained and developed the open source framework OpenCPI alongside a small team of developers
· Worked in an agile environment to deploy a company's existing Atlassian and workflow stack to AWS
· Worked with a small team of engineers to help create an optimized frontend device for another company

Branch Manager Oct. 2022 – Present

· Managed a small team, handling timecards, performance reviews, career guidance, and promotions.
· Conducted interviews and facilitated cash awards to recognize and reward exceptional performance.

Ventura Solutions May 2015 – Dec. 2015
Software Engineer Intern *Annapolis Junction, MD*

· Collaborated with four other interns to integrate OpenCL into the REDHAWK SDR framework
· Created and optimized a channelizer on an Altera FPGA using their OpenCL specification

Ovations Food Service Mar. 2013 – Aug. 2015
Concession Stand Worker *Frederick, MD*

· Took orders and payment for a concession stand at the Frederick Keys baseball stadium
· Applied concepts learned in school to create an android application to speed up inventory process

SKILLS

Programming Experience
Python, Java, C, C++, Ruby, OpenCL, SQL, OCaml, Prolog, Bash, JS, PHP, Powershell, and C#

Operating Systems
Windows and Linux (Red Hat, Centos, Ubuntu, and Rocky Linux)

Other Skills
Word, Excel, PowerPoint, and LaTeX
Git, RPM, Docker, Eclipse, Android Studio, CVS, SVN, VMware, VirtualBox
Object Oriented Analysis, Object Oriented Design
HTML, CSS
AWS, Agile development, Atlassian Tool Suite, Jenkins, Sonarqube, Terraform
GitLab, CI/CD

RELEVANT GRADUATE COURSEWORK

Graduate Database Design	Machine Learning for Trading	Software Architecture and Design
Information Security	Computer Networks	Software Development Process
AI for Robotics	Video Game Design	Quantum Computing
Graduate Algorithms		

RELEVANT UNDERGRAD COURSEWORK

Computer Architecture	Database Design	Computer Networks
Data Structures	Machine Learning	Programming Handheld Systems
Programming Languages	Algorithms	Objected Oriented Design
